

# BFS 110

## Brake Flush Service

- One man operation
- 2 qt new fluid and 10 qt. used fluid tanks
- Light-weight (70 lbs)
- Small Size
- Automatic low fluid level shut-off

- The BFS 110 is powered by a 12 volt battery and produces constant pressure at 0-50 psi which makes it easy to use on any type of vehicle brake system.
- A low fluid shut-off prevents air from getting into the brake system.
- Easy to use with one of the many adapters provided to fit virtually all manufactured vehicles
- Built-in vacuum system to clean out fluid reservoir
- New & used fluid level indicators
- Compact & light-weight for easy storage and maneuverability
