

# TF 310/320

## **AUTOMATIC TRANSMISSION CLEANER & FLUID CONDITIONER**

**TF 310 is a concentrated cleaner designed to safely and efficiently remove varnish and oxidized deposits from critical transmission components. Releases sticking valves and solenoids. Contaminants are flushed out with the used oil.**

**TF 320 is designed to improve automatic transmission fluid thermal stability. A concentration of critical additives improves fluid oxidation stability and reduces varnish and sludge buildup on sensitive transmission components. Helps maintain shift quality. Conditions seals and O rings to keep them soft and pliable. Meets specifications issued by major automotive manufacturers around the world. These two products will not void OEM warranty.**
