

Pure Nitro Tire Inflator N2-900

KENVO TECHNOLOGY INC.

- Whole process takes only minutes
- 5 Tires at one time - all 4 & Spare Tire
- Produces its own nitrogen
- Shop air only

Kenvo Technology brings you the very best in replacing regular air with nitrogen. Kenvo has developed a five-tire valve system to enable the user to service and four tires and spare tire at once. The machine only needs shop air, no electrical power. Other machines makes the user fill and deflate the tires multiple times to achieve 95% nitrogen in the tires. The Pure Nitro applies a slight vacuum to evacuate all the air before filling the tires with nitrogen, only needing to inflate them once. The end result is a much faster service with 96-98% nitrogen in the tires.
