

BFS 125 Brake Flush Service

KENVO TECHNOLOGY INC.

This brand new brake machine is now using the venturi vacuum system. Saving costs on replacing pumps and motors. Easy to use with one of the many adapters provided to fit most manufactured vehicles. As well this newly designed machine is made with a chemical resistance powder epoxy paint to help with-stand brake fluid that it may come in contact with.

Features:

- Metal fitting tray on the top to set adapters on while working.
- Built in storage to keep all fittings in.
- Light weight 75 Lbs
- Small Size
- Compact & light weight for easy storage & maneuverability
- New and Used fluid level indicators
- Shop Air
- 2 qt. New Fluid Tank
- 10 qt. Used Fluid Tank.
- Solid base and castors with a brake so the machine stays in place.
